GPS – Global Positioning System – the great invention to never get lost again! But is that really so? The GPS only works if the actual location and the goal are known. What if we have our doubts about where we are right now or where we are going!

How about a Spiritual GPS? A device that helps to find our current position and leads us to the desired goal!

We invite you to take time off from the daily rush of life and search for that inner GPS: What is important for me? What is the ground I stand on made of? How is my position in relation to the people around me and to God? Looking back on my life, what were important experiences? Where did I miss an exit or when was I lost? Maybe sometimes we were in a place without signal, like a dead end, how did we get back?
